PROFESSIONAL SUMMARY

Motivated Electronics and Communication Engineering student with hands-on experience in Python programming, data analysis, web development, and technical projects. Skilled in programming fundamentals, data structures, problem-solving, and developing practical applications. Gained industry exposure through internships in embedded systems, Java, robotics, electronics, and Python. Seeking an entry-level opportunity in the IT industry to apply technical skills, learn new technologies, and grow as a software professional.

EDUCATION

B.E. Electronics and Communication Engineering

PSV college of engineering and technology, India, Tamil nadu

[2023 - present](#)

percentage - 81%

Government Higher Secondary school, patchur

[2022 - 2023](#)

Percentage - (74%)

Government Girls High school, patchur

[2020 - 2021](#)

Passed

INTERNSHIPS

Embedded Systems Intern

National Small Industries Corporation (NSIC), India, Chennai

[March 2024 - March 2024](#)

Java Intern

EdVedha, India, Online

[January 2025 - February 2025](#)

Robotics Intern

SKMT electronics, India, Tirupattur

[2025 - 2025](#)

Electronics Intern

Training Institute, India

[2024 -](#)

Python Intern

Jerose Corp, India, online

July 2025 - September 2025

Cloud Computing

Training Institute, India, salem

December 2025 - February 2026

PROJECTS

Radar System using MEMS

- Developed a radar-based detection system using MEMS sensors for object detection.
- Implemented signal processing techniques to analyze and interpret data.

Hear the Heart - Body Area Network

- Designed a body area network system to monitor heart signals.
- Enabled wireless transmission of real-time health data.

Gesture Driven IoT Control - ESIOT

- Built an IoT-based system to control devices using hand gestures.
- Integrated sensors and microcontrollers for real-time interaction.

Task Manager - Python | [GitHub](#)

- Developed a menu-driven task management application to add, view, complete, and delete tasks.
- Used Python functions, lists, dictionaries, loops, and conditional statements.

ATM Simulation - Python | [GitHub](#)

- Developed a console-based ATM application with PIN authentication, balance checking, deposit, and withdrawal features.
- Implemented Python functions, loops, conditional statements, and user input handling.

Library Management System - Python, JSON | [GitHub](#)

- Developed a menu-driven library management application to add, view, search, issue, and return books.
- Implemented Python functions, lists, dictionaries, loops, conditional statements, and JSON for data storage.
